Research Statement(s)

I study Near-Field Cosmology and Galaxy Evolution using both optical telescopes and cosmological simulations. In particular, my work focuses on ultra-faint dwarf galaxies — researching these possible relics of the first galaxies ever formed to learn more about the Early Universe, how the earliest galaxies evolve, and how they can be used as a tool to learn more about our own galaxy, the Milky Way.

Alongside this astrophysics research, I work to improve the astronomical community for all, including publishing articles to help spread successful programs. I have created peer mentorship programs implemented at my alma mater, UC Irvine, and within the Cal-Bridge Program. My aim is to normalize a holistic approach to academic success and strengthen marginalized communities.

Education

University of California, Irvine

Irvine, California

Ph.D. in Physics

Sep 2016 - Dec 2021

- Thesis Advisor: Prof. Michael Cooper
- Thesis: Ultra-Faint Dwarf Galaxies: Investigating the Evolution of Our Universe & Those Who Study It

University of California, Irvine

Irvine, California

M.S. in Physics

Sep 2016 - June 2019

- GPA: 3.34 out of possible 4.00

California State University, Long Beach

Long Beach, California

M.S. in Physics

Aug 2015 - May 2016

- GPA: 4.00 out of possible 4.00
- Transferred to Ph.D. Program

California State University, Long Beach

Long Beach, California

B.S. in Physics

Jan 2011 - May 2015

- Minor: Math
- Overall GPA: 3.15 out of possible 4.00
- Major GPA: 3.20 out of possible 4.00

Mount San Antonio College

Walnut, California

A.A.

Jan 2004 - June 2009

- Majors: Fine Arts, Natural Science & Math, Social & Behavioral Sciences
- Overall GPA: 3.32 out of possible 4.00

Teaching Experience

ASTR110L: Introduction to Astronomy Lab

CSU Long Beach

Instructor on Record

Aug 2015 - May 2016

- Duties included creating and implementing syllabi based off the department's experiment schedule, homework assignments, exams and final projects (sample syllabi can be viewed at https://mkrodriguezvimberly.github.io/outreach_teaching_service/astro100Lsyllabus.html).
- CSULB Official Instructor Evaluations were given after each term and I was guided on how to interpret the feedback and implement desired improvements by the CSULB Physics & Astronomy Department Chair.

Highlighted Mentorship

Cal-Bridge Mentorship Handbook

Revision Team Lead

June 2021

- Led team of 4 other Cal-Bridge Alumni in rewriting the program's mentorship handbook with the guidance of the program's director.
- Revisions focus on reciprocal mentor-mentee relationships (especially in that as much as students need to adapt to academia, mentors and academia need to adapt to students), highlighting hurdles specific to many underrepresented groups within STEM, and mental health
- Publicly available at <https://tinyurl.com/CBMentorshipHandbook>

Cal-Bridge Mentor Map

Author

Aug 2020

- Created a Mentor/Support Network Map designed specifically for undergraduate STEM students.
